1. Introduction:

UT Administration of Daman and Diu, Daman FLOOD CONTROL PLAN

The low lying areas of Daman District in the UT of Daman & Diu are flood prone. The heavy rainfall and release of large quantity of water from Madhuban Dam, Piparia River in Gujarat and Sakhartoda River in Maharashtra tend to create flood situation and also temporary water logging in Daman.

The U.T. Administration has opened a Flood Control Room in Collectorate which receives information regarding discharge of water from Madhuban Dam from time to time.

During the Monsoon season, flood control measures and timely action for relief and rehabilitation are mandatorily required for which the following orders are hereby made:

2. SET UP OF FLOOD CONTROL ROOM AT THE COLLECTORATE, DAMAN:

- A.** A Flood Control Room has been set up at the Collectorate, Daman from 01/06/2017 (The Control Room will draw staff on rotation from all the departments of Daman District) to monitor flood situation and provide relief, rehabilitation and assistance to effected persons. It will function for 24 hours till 30/09/2017. Any information/ complaint regarding flood, heavy rain, water logging or any other calamity may be given to the control room by the officers, NGOs and general public. The control room telephone number is 2230049 (Telefax).

The important telephones of the officers made available to the control room are as under:

Sr. No.	Name & Designation of the Officer	Office No.	Mobile No.
1	Shri Sandeep Kumar Singh, Collector & District Magistrate, Daman.	2230698	9436289791

3. FLOOD CONTROL DATA AND DETAILS OF SHELTERS:

A Release of water from Madhuban Dam and danger Levels:-

The Madhuban Dam has a large catchment area. Even if the rainfall in Daman is moderate, the heavy rainfall in catchment area in the adjoining States of Gujarat and Maharashtra result in constant flow of large volume of water to the Dam. In addition Piparia river and Sakhartoda rivers also merge in Damanganga river on the way to Daman. Hence, it becomes imminent to coordinate with Madhuban Dam Authorities, so as to ensure that heavy discharge of water is not releases during high tide and heavy rains in the Territory. The Executive Engineer, Madhuban Dam is therefore informed to ensure that water should be released from the Dam during monsoon season keeping in view the rain situation as well as the prevailing high tide period to avoid flood situation in Daman. Care should also be taken to note that excess water should not reach Daman when it is high tide at the coast of Daman.

B IMPORTANT DATA ABOUT DAMANGANGA BASIN:

Sr.No.	Site (in meters)	Danger level (in meters)	Warning level
1	Madhuban Dam	82.40	79.86
2	Daman (Near Old Bridge)	3.40	2.60

C LIST OF VILLAGES LIKELY TO BE AFFECTED BY THE FLOOD:

The areas which are affected by heavy rain and flood water are identified as low lying areas. They are as following, in order of its being progressively prone to flooding.

A Nani Daman side:	B Moti Daman side:
.	.
i. Mitnawad Khariwad	i. Zari
ii. Kharawad	ii. Ambawadi
iii. Ghachiwad	iii Dholar
iv. Holi Falia/Koda Falia/Jain Street	
v. Varkund	
vi. Mitnawad kachigam	

*Map attached at end of booklet.

D INSTALLATION OF MARKERS BY P.W.D

Public Works Department, Daman has established S.S level gauge / R.C.C. pillars as markers at various sites in Daman for the purpose of measuring the warning and danger level of flood during monsoon. The same is shown in the map provided in the end of this booklet.

E APPROXIMATE DISCHARGE LEVEL FROM THE DAM AND ITS IMPLICATION FOR DAMAN:

Sr. No.	Water Discharge	Preparation	Signal
1	1,50,000 CUS	ALERT	WHITE
	4247 CUM		
2	2,00,000 CUS	READY FOR EVACUATION	BLUE
	5663 CUM		
3	2,50,000 CUS	IMMEDIATE EVACUATION	RED
	7079 CUM		

IMPORTANT:

In addition to the water from Madhuban Dam water from Piparia river in Gujarat and Sakartoda river in Maharashtra/Gujarat also gets discharged in Damanganga river down stream of Madhuban Dam, and thereby draining an additional basin area of 513 sq.kms. (in addition to Madhuban Dam Basin/catchment area of 1800 sq.kms.).

NOTE:

- (1) This figure has been estimated keeping the high tide condition in view.
- (2) The above figures are tentative and subject to tidal conditions as well as not taking into consideration the rains in upper region of Piparia river in Gujarat and Sakartoda river in Maharashtra (which also flows downstream of Madhuban Dam). The officials are advised to have physical verification of the condition on the ground before taking a decision.
